JAWABAN UTS BAHASA INGGRIS 2021

A.

1. Computer server is a computer with particular service on network. This computer is like a parent who store and manage information and distribute to other computers in order to be used together.
2. Components of server
   - Motherboard : The motherboard is a circuit board inside a computer with all the components in your computer be connected. The main components is processor (CPU).
   - Processor : CPU is the brain of the computer, this is the first component of people think of when they want to buy a computer server.
   - Memory : Total memory capacity of the server depends on the motherboard, so you need to choose the right type of memory.
   - Hard drives : Hard drive in computer called IDE drives, the drive is enough for individual users, other types of drives are known as SCSI is typically used instead.
   - The network connection : Many servers have a network adapter built into the motherboard. If your server is not equipped with it, you will need to add an adapter card for a separate network.
   - Power supply : require greater power(300 watts in general). If the server has a hard drive, in smaller amounts, may require greater power.
3. CPU stand for Central Processing Unit
4. Function of computer server :
   - Application server to store a wide variety of applications that will be accessed by the client computer.
   - Proxy server is a function of a meaningful set of network traffic with proxy settings.
   - Database server can be used to store the contact details of the costumer and order information.
5. Database can be used to store the contact details of the customer and order information, as well as shipping and payment notes. By accessing the server via a local network, multiple employees can retrieve and update information from the database throughout the day as the business is conducted.

B.

1. T

2. F

3. F

4. F

5. T

C.

1. heat

2. argue

3. legalize

4. protectively

5. original

D.

1. released

2. sold

3. innocent

4. artificial

5. denied

E.

Conversation 1

1) Virus in the device.
2) Computer service center.
3) Pop-up message, antivirus, software.

Conversation 2

1) How to turn up the computer and browsing the internet.
2) In the computer store.
3) Computer, browsing, CPU.

Conversation 3

1) The slow run of the computer.
2) Not mentioned in the text. Maybe at home.
3) Computer, slowly, virus.
